

SYMPHONY CABINET LCR SPEAKER

SONANCE SYMPHONY® CABINET LCR

From Sonance, the first company to bring high-fidelity sound to in-wall speakers, our Symphony line is designed for multi-room audio throughout your home. Now you can give your customers a high quality LCR cabinet speaker designed to match the Symphony line of in-wall and in-ceiling speakers for home theater applications.

The Symphony Series truly establishes the benchmark for all other speakers to compare to. Experience optimal tonal quality that matches with Symphony in-wall and in-ceiling speakers. This LCR can be used as left, center and right channel speakers in a beautifully designed black vinyl enclosure that will compliment any existing modern electronics installations.

The new Symphony Cabinet LCR has magnetically shielded components to allow placement near video monitors and plasma TVs. The boundary compensation switch adjusts low frequency level when the speaker is placed on top of a television or in a wall unit.
